Subject Index – Volume 51

Adaption of production processes, electronics manufacturing in 2020 and, 185
Advertising response literature, diffusion models of first-time purchase and, 265
Altered materials, electronics manufacturing in 2020 and, 185
Annual data, diffusion models of first-time purchase and, 265
Applications, electronics manufacturing in 2020 and, 185
Archival data, biotech research firms and, 173
Asset reduction, by Russian and Rumanian market managers, 37

Base technology, diffusion pattern of, 109
Bass diffusion model, extension of, 109
Behavioral assumptions, of diffusion theory, 109
Bias, diffusion models of first-time purchase and, 265
Biomass, energy system restructures and, 1
Biotech firms, larger, 173

Capital investment projects, cost-benefit analysis and, 209
Capital stock, global energy perspectives and, 237
Car parts industry, in Hungary, 65
Carbon emissions, decrease in per unit energy, 1
Cash-generation strategies, by Russian and Rumanian market managers, 37
Choice of frequency, temporal aggregation in diffusion models of first-time purchase and, 265
Client, ideal, 95
Climate change, global, 45
Collaborative research agreements, biotech research firms and, 173
Competitiveness
  global, 207
  national indicators of, 133
Complexity, system, 195
Compound interest law, time preference equivalence to, 209
Computer networks, virtual classroom and, 301
Consumer durables, diffusion models of first-time purchase and, 265
Cost-benefit analysis, choice of time preference and, 209
Customer follow-up team, defense development projects and, 151

Debt restructuring, by Russian and Rumanian market managers, 37
Decarbonization, contribution of to dematerialization, 1
Decision makers, IATAFI and, 45
Defense development projects, identifying critical success factors in, 151
Delphi study, of electronics manufacturing in 2020, 185
Design to cost, defense development projects and, 151
Developed countries, decarbonization in, 1
Developing countries, decarbonization in, 1
Diffusion
  in Hungary, 65
  IATAFI and, 45
  mathematical framenworks and applications, 107
  successive generations of technological innovations and, 109
Discount factor, of form, 109
Discount rates, cost-benefit analysis and, 209
Divergence, global energy perspectives and, 237

Early phases, defense development projects and, 151
Early planning, electronics manufacturing in 2020 and, 185
Economic growth, carbon dioxide emissions increasing faster than, 1
Economic performance, electoral outcome as function of, 281
Economic prospects, global energy perspectives and, 237
Electoral outcome model, earlier prediction and, 281
Electricity, energy system restructures and, 1
Energy policies, cost-benefit analysis and, 209
Energy resource base, global energy perspectives and, 237
Engineering, technology and, 101

Enterprise ownership, and Russian and Rumanian marketing managers, 19
Environment
  cost-benefit analysis and, 209
  decarbonization and, 1
  electronics manufacturing in 2020 and, 185
  global energy perspectives and, 237
Europe, technological assessment in, 55
Expenses, biotech research firms and, 173

Feasibility, defense development projects and, 151
Final energy, decarbonization of, 1
Financial control procedures, by Russian and Rumanian market managers, 37
Financing requirements, global energy perspectives and, 237
First time purchase, diffusion models of, 265
Flexibility, decarbonization and, 1
Forecasting models, electoral outcome and, 281
Foresight, as survival characteristic, 209
Formal energy models, global energy perspectives and, 237
Fossil fuels, global energy perspectives and, 237
Funding strategies, biotech research firms and, 173

Gases, energy system restructures and, 1
Generation of innovation, in Hungary, 65
Generations, of technological innovations, 109
Generic turnaround strategies, commonly used, 37
Global competitiveness, management of new technologies for, 207
Global energy perspectives, summary of Joint Institute for Applied Systems Analysis and World Energy Council study, 237
Globalization of trade, IATAFI and, 45
Global level, decarbonization occurrence at, 1
Global spread, of terrorism, 295
Gross profit margins, successive generations of technological innovations and, 109
Growth phenomena, mathematical frameworks and applications, 107
Growth strategies, biotech research firms and, 173

Hungary, institutional support for technological improvement in, 65
Hydrogen, energy system restructures and, 1

IBM mainframe computers, four successive generations on, 109
Indicators, of national competitiveness, 133
Indirect effects, of economic bellwethers on electoral outcome, 281
Industry
  decarbonization and, 1
  global energy perspectives and, 237
  high-tech competitiveness of nations and, 133
  technological development in Hungary and, 65
Infrastructures, global energy perspectives and, 237
Inherited structure, in Hungary, 65
Innovation, in Hungary, 65
Input indicators, of nation's future capacity, 133
Institutional arrangements, IATAFI and, 45
Integrated circuits, successive generations of technological innovations and, 109
Integrated products, electronics manufacturing in 2020 and, 185
Intensity, biotech research firms and, 173
Inter-firm cooperation, in Hungary, 65
International Association of Technology Assessment and Forecasting Institutions (IATAFI)
  challenges of networking in technology assessment and, 49
  European-level technological assessment infrastructure and, 55
  institutional support for technological improvement in Hungary and, 65
  origins, goals, and visions of, 45
International Institute for Applied Systems Analysis (IIASA), global energy perspectives and, 237
Israel, defense projects in, 151

Joint stock ownership, and Russian and Rumanian marketing managers, 19

Kennedy assasination, electoral outcome modeling and, 281

Larger firms, biotech, 173

Lead time, global energy perspectives and, 237
Learning, without limits, 301
Local level, global energy perspectives and, 237
Long view, cost-benefit analysis and, 209

Machine tool industry, in Hungary, 65
Managerial variables, critical to success of defense projects, 151
Manufacturing
  Hungarian, 65
  in 2020, 185
Market economy, in Hungary, 65
Market forces, effects of on Russian and Rumanian marketing managers, 19
Marketing managers, in Russia and Rumania, 19, 37
Market potentials, relative size of, 109
Mass flows, carbon dioxide emissions and, 1
Methane economy, energy system restructures and, 1
Military environment, perceived need for project output and, 151
Mini-Delphi, of electronics manufacturing in 2020, 185
Monthly data, diffusion models of first-time purchase and, 265
Multivariate analysis, of defense development projects, 151

National technological university management, of technology mini-Delphi, 185
Nations, future high-tech competiveness of, 133
Natural gas, energy system restructures and, 1
Networking
  computer, 301
  in technology assessment, 45, 49
New technologies, decarbonization and, 1
Nonfossil fuels, global energy perspectives and, 237
Nonlinear least squares, diffusion models of first- time purchase and, 265
"Now or at maturity" rule, successive generations of technological innovations and, 109
"Now or never" rule, successive generations of technological innovations and, 109
Nuclear energy, energy system restructures and, 1

Ordinary least squares, diffusion models of first-time purchase and, 265
Output indicators, of nation's future capacity, 133

Parameter estimates, diffusion models of first-time purchase and, 265
Pharmaceutical industry, in Hungary, 65
Politics, technology and, 101
Primary energy, carbon intensity of, 1
Private ownership, and Russian and Rumanian marketing managers, 19
Produceability
  defense development projects and, 151
  R&D, 309
Production
  decarbonization and, 1
  electronics manufacturing in 2020 and, 185
  in Hungary, 65
Professional qualifications, defense development projects and, 151

Quality, defense development projects and, 151
Quarterly data, diffusion models of first-time purchase and, 265

R&D
  cost-benefit analysis and, 209
  larger biotech research firm strategies and, 173
  project selection and, 309
Random exogenous events, electoral outcome modeling and, 281
Recovery strategy, by Russian and Rumanian market managers, 37
Redeployment, in Hungary, 65
Reliability, defense development projects and, 151
Revenue growth, biotech research firms and, 173
Rumania
  generic turnaround strategies in, 37
  marketing managers in, 19, 37
Russia
  generic turnaround strategies in, 37
  marketing managers in, 19, 37

Silicon chips, successive generations of technological innovations and, 109
Simultaneous equation system, electoral outcome and, 281
Size, biotech research firms and, 173

Small firms, biotech, 173
Social management, of technology, 101
Societal speedup, system complexity and, 195
Specific energy requirements, decreasing material intensity and, 1
State ownership, and Russian and Rumanian marketing managers, 19
Strategy
  biotech research firms and, 173
  larger biotech research firm, 173
  technology and, 305
Substitution patterns, of successive generations of technological innovations, 109
Successive generations of technological innovations, timing, diffusion, and substitution of successive generations of, 109
Survival characteristics, projected cost-benefit ratios and, 209
System complexity, price of, 195

Team spirit, defense development projects and, 151
Technological advance
  global energy perspectives and, 237
  IATAFI and, 45
  strategy and, 305
Technological slowdown, or societal speedup, 195
Technological time warp, in Hungary, 65
Technology assessment, network building and, 45, 49, 55
Temporal aggregation, diffusion models of first time purchase and, 265
Terrorism, thriving future for, 295
Time-interval bias, diffusion models of first time purchase and, 265
Time preference, as behavioral fact of life, 209
Time to market, successive generations of technological innovations and, 109
Timing, of successive generations of technological innovations, 109
Total income, biotech research firms and, 173
Transboundary problems, IATAFI and, 45
Transistors, successive generations of technological innovations and, 109

Uncertainty, projected cost-benefit ratios and, 209
Unit ecomonic output, decreases in energy requirements per, 1

Vacuum tubes, successive generations of technological innovations and, 109
VALUE II Think Tank group, European-level technological assessment infrastructure and, 55
Variability, in projected cost-benefit ratios, 209
Viability, biotech research firms and, 173
Virtual classroom, learning without limits via computer networks, 301
Voter approval, electoral outcome as function of, 281

Workforce, electronics manufacturing in 2020 and, 185
World
  IATAFI and, 45
  in 2020, 105
  in 2044, 105
  pervasiveness of decarbonization in, 1
World Energy Council (WEC), global energy perspectives and, 237
World population prospects, global energy perspectives and, 237

Year-ahead forecasts, of presidential elections, 281
Year 2020
  electronics manufacturing in, 185
  world in, 105
Year 2044, world in, 105
Year 2050, global energy perspectives and, 237
Yield curve, as electoral bellwether, 281

Zero-carbon options, energy system restructures and, 1
